The Missing Link

The missing reading link that Magical I Am™ provides is learning “How to read the 300 Most Commonly Read Abstract Words and Symbols.” Teachers drill these words until memorized, hoping these words will make it into long-term memory. However, unlike the words that are concrete these “Commonly Read Words” are abstract, (have no innate sensory association) and become the stumbling blocks connected with most reading disability symptoms.

There is notable confusion among the education experts for learning to read the Most Commonly Read Words... and they don't even know it! Academia distinguishes this group of words by eight different names:

1. Abstract Words

2. Sight Words
3. Stumble Words
4. Dolch Words
5. Outlaw Words
6. Trigger Words
7. Fry Words
8. Most Commonly Read Words

No matter what the label for this group of words, up till now the popular teaching method has been rote and drill. Unfortunately, many of these words still remain “unreadable” by too many children.

The First 25 Most Commonly Used English Words – All are Abstract Words.

These words make up about 1/3 of all printed material in grades K-3.
